

Outline of Support Program Participants (in alphabetical order-omission of corporate personality)

| Company Name                          | Country   | Services details (to succeed in)  | Website   |
|---------------------------------------|-----------|---|---|
| Descartes Underwriting                | France    | We provide parametric insurance* targeting natural disasters and extreme weather events to businesses and public institutions.<br>*Parametric insurance is a type of insurance that pays out a predetermined amount quickly when the conditions set in the insurance contract are met.      | <a href="https://descartesunderwriting.com/">https://descartesunderwriting.com/</a> |
| Egregium                              | Japan     | We develop investment advisory services utilizing AI and algorithms, contributing to the realization of investments that align with customers' life plans and goals.  | <a href="https://www.egregium.jp/about">https://www.egregium.jp/about</a>           |
| Everimpact                            | France    | We provide a one-stop platform for the measurement, reporting, and verification of greenhouse gas emissions in corporations and local government organizations.   | <a href="https://www.everimpact.com/">https://www.everimpact.com/</a>               |
| Fivot                                 | Japan     | Using our proprietary credit model, we predict the future potential and business viability of startups. Leveraging this model, we have developed a new service where we pay expenses on behalf of companies and later collect the amount in installments.                                   | <a href="https://fivot.co.jp/">https://fivot.co.jp/</a>                             |
| GarageBank                            | Japan     | We have developed a unique appraisal system using machine learning that provides a service to easily assess and monetize the value of possessions such as electronic devices and branded goods using smartphones and similar devices.   | <a href="https://www.garagebank.co.jp">https://www.garagebank.co.jp</a>             |
| GeNiE                                 | Japan     | We offer a service that allows retailers and similar businesses to easily integrate lending functions into their own services, contributing to the expansion of their sales.  | <a href="https://genie-ml.com/">https://genie-ml.com/</a>                           |
| Graphene Japan                        | US        | We utilize digital humans with high intelligence quotients and human-like qualities, based on AI that mimics the human brain, in the back office and customer-facing operations of financial institutions.  | <a href="https://www.graphen.ai">https://www.graphen.ai</a>                         |
| Infcursion                            | Japan     | By adding a post-payment service to the various payment methods we offer for corporate transactions, we support companies in managing their cash flow and improving operational efficiency.   | <a href="https://infcurion.com/">https://infcurion.com/</a>                         |
| Japan GX Group                        | Japan     | Through the development and operation of a carbon credit exchange and GX consulting for major corporations, we support the advancement of corporate GX initiatives and promote carbon neutrality and nature positivity in Japan.  | <a href="https://sb-ge.com/">https://sb-ge.com/</a>                                 |
| LifeNet Insurance Company             | Japan     | By utilizing the My Number system, we aim to simplify insurance contract procedures and achieve zero non-payment of benefits and insurance claims.  | <a href="https://www.lifenet-seimei.co.jp/">https://www.lifenet-seimei.co.jp/</a>   |
| MILIZE                                | Japan     | We provide a service that uses AI to analyze past transaction data related to art pieces, enabling unmanned and rapid valuation assessments, thereby contributing to the revitalization of the art market.  | <a href="https://milize.co.jp/">https://milize.co.jp/</a>                           |
| Mitsui & Co. Digital Asset Management | Japan     | We offer a service that enables fractional investment in alternative assets such as real estate through digital securities, contributing to the expansion of investment options.  | <a href="https://corp.mitsui-x.com/">https://corp.mitsui-x.com/</a>                 |
| Ownership                             | Japan     | We develop a service that allows issuers of digital securities to offer their own coins to investors, contributing to the strengthening of the relationship between issuers and investors.  | <a href="https://www.ownership.jp/">https://www.ownership.jp/</a>                   |
| Trust                                 | Japan     | We develop a service that utilizes generative AI to understand the specifications of outdated and complex financial systems and assist in their renewal to the latest systems. This enables financial institutions to reduce their burden and shorten the time required for system updates. | <a href="https://trust-partner.co.jp/">https://trust-partner.co.jp/</a>             |
| Wattcrowd                             | UK        | We provide opportunities for individuals to invest in solar panels. Investors can earn lease income from the panels, leading to the creation of new investment opportunities.   | <a href="http://www.wattcrowd.solar">www.wattcrowd.solar</a>                        |
| WeavAir                               | Singapore | We offer a tool for banks and asset management companies that uses satellite data and drone imagery to perform real-time analysis and future predictions of global environmental data such as greenhouse gases.   | <a href="https://weavair.com">https://weavair.com</a>                               |
